github.com/keyurkadam

Full Stack Web Developer proficient in fundamental front-end languages and server-side languages. In-depth knowledge of Oracle, MySQL and MongoDB. Analytical and precise professional with 4+ years of hands-on experience taking charge of front and back-end web development. Skillful creating servers and databases for functionality and designing and developing APIs. Hardworking collaborator with track record of superior results.

SKILLS

- Performance Optimization
- Problem Solving
- API Integration
- Troubleshooting & Debugging
- Backend - NodeJS (Express) / PHP / Python
- Full Stack Development - MERN
- Frontend - ReactJS
- DBMS - MongoDB, OracleSQL, MySQL
- Web Technologies - GIT, Laravel, CraftCMS, Wordpress, Bigcommerce

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

March 2019 - Aug 2023

Dynamic Dreamz

- Developed 15+ high performance, scalable NodeJS services leading to overall efficiency increase.
- Developed user interfaces using ReactJS, jQuery and CSS from scratch.
- Gathered and validated multiple requirements from clients as part of the collaboration for high profile web applications.
- Provided front-end website development using WordPress, Craft CMS and other editing software.
- Oversaw back-end development using PHP to maintain website integrity.
- Developed 10+ APIs for Bigcommerce project.
- Developed custom plugin for CraftCMS.

EDUCATION

Msc Software Engineering

Sep 2023 - Sep 2024

University of West London

- Focused on developing advanced web applications with mobile components, utilizing frameworks like React Native and Ionic for cross-platform compatibility.
- Explored advanced concepts such as design patterns, architectural styles, and software development methodologies to enhance understanding and application of industry best practices.
- Studied algorithms and techniques for machine learning, including supervised and unsupervised learning, deep learning, and natural language processing, to develop intelligent software systems.

Bsc Information Technology

June 2015 - April 2018

Veer Narmad South Gujarat University

- Proficiency in both front-end (JavaScript, CSS) and back-end (PHP) development.
- Strong understanding of database management systems (DBMS, RDBMS) for efficient data handling.
- Familiarity with .NET framework, enabling development of scalable web applications.

PROJECTS

Real-Time Chat Application with MERN Stack

[Link](#)

- Developed a fully functional real-time chat application using the MERN stack (MongoDB, Express, React, and Node.js).
- Leveraged WebSockets to establish real-time communication between clients and the server.
- Implemented user authentication and authorization using JSON Web Tokens (JWT) to ensure secure access to chat functionality.

Weather Application

[Link](#)

- Developed a web application using React.js that provides real-time weather information based on the user's current location and also search the desired location.
- Leveraged the browser's Geolocation API to retrieve latitude and longitude coordinates.
- Integrated with a weather API (e.g., OpenWeatherMap) to fetch weather data for the user's location.

Web Scraping

[Link](#)

- Developed a Jupyter Notebook that leverages Python libraries such as BeautifulSoup and Requests to scrape data from Wikipedia.
- Created a CSV file containing the extracted data, ensuring compatibility with other tools and applications.
